Preface

This is a reprint of an experimental edition of **Games and Activities for Class II: Worksheets** prepared for the **School Mathematics Project** in 2001 with the help of teachers from the participating schools. It is accompanied by a **Teachers' Guide**, which explains and gives ideas on how the work sheets in this book might be used, and also gives ideas for additional activities. As part of the same project, another book was written for Class I. Although the books are labelled Class I and Class II, the games, activities and worksheets can be used for any age, depending on the needs of the students.

Please note that each worksheet carries a legend at the bottom right hand corner of the page. The legend starts off by specifying the type of work sheet, e.g. whether it has to do with money, time, etc. Each type of work sheet is numbered. The final element of the legend identifies the number of the work sheet, which runs from WS 1 to WS 63. Use these numbers to find the page of the Teachers' Guide which corresponds to a particular work sheet.

$$(3 + 6) - 5 = \square$$

$$(3 + \square) + 5 = 16$$

$$(11 + 5) - 3 = \square$$

$$(12 - \square) + 2 = 9$$

$$(5 + 9) - 3 = \square$$

$$(13 - \square) + 3 = 11$$

$$(7 - 2) + 6 = \square$$

$$(7 - \square) + 4 = 2$$

$$(16 - 4) + 4 = \square$$

$$(5 + 3) + \square = 13$$

$$(6 - 1) + 6 = \square$$

$$(10 + 5) + \square = 20$$

$$(13 - 2) - 7 = \square$$

$$(8 + 3) + \square = 17$$

$$(20 - 4) - 3 = \square$$

$$(\square + 7) + 8 = 18$$

$$(\square + 6) + 5 = 13$$

$$(11 + 2) - 3 = \square$$

$$(\square + 3) + 11 = 20$$

$$(13 - 6) + \square = 14$$

$$(\square + 4) + 3 = 14$$

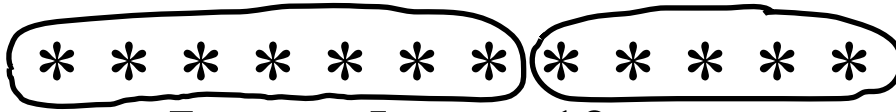

$$(17 + 3) - 5 = \square$$

$$(6 + \square) + 3 = 11$$

MAKE SUMS

Draw rings to show how to make different sums. Write the sums.

 $7 + 5 = 12$

 $\square + \square = 12$

 $\square + \square = 12$

 $\square + \square = 12$

 $\square + \square = 15$

 $\square + \square = 15$

 $\square + \square = 15$

 $\square + \square = 15$

 $\square + \square = 15$

Now choose whatever sums you want. Draw and write them on the back.

MAGIC SQUARES

The four numbers across each row add up to 34.

The four numbers down each column add up to 34.

For example, $1 + 8 + 13 + 12 = 34$

and $1 + \square + 4 + 15 = 34$.

Can you fill in the missing numbers?

15			6

Another Magic Square

This time the four numbers across each row add up to 65.

The four numbers down each column add up to 65.

MULTIPLICATION SQUARES

This is a **Multiplication Table**:

1	2	3	4	5
2	4	6	8	10
3	6	9	12	15
4	8	12	16	20
5	10	15	20	25
